Claims 1-9, 13-21 and 27 are pending.

Claims 1-8, 13-21 and 27 are allowed. Applicant is advised that a search update would have to be done at the time of the preparation of notice of allowance, when appropriate. In this regard, if applicant is aware of any other pending cases assigned to Unilever that may raise an issue of obviousness type double patenting, applicant is requested to bring such cases to the attention of the examiner or file appropriate terminal disclaimers.

Claim 9 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Independent claim 1 recites three specific iron (III) chelators. Dependent claim 9 requires that the iron (III) chelator have a binding coefficient of greater than 10^{26} . The specification discloses that preferred chelators have binding constant of 10^{26} or greater (p. 10, lines 1-2). The three chelators in independent claim 1 are all preferred chelators (p. 11, lines 5-21). Therefore, there is reasonable basis for concluding that the "coefficient" or "constant" for all three of the chelators in claim 1 is **already** greater than 10^{26} . As a result, dependent claim 9 fails to further limit claim 1.
